## Namestitev

Domov > Namestitev

Potovanje se ne konča na letališču destinacije. V kolikor nimamo namestitve že urejene, lahko nastopijo težave, predvsem pa nepotrebni izdatki le-te v zadnjem trenutku.

Kadar človek potrebuje sedaj in takoj, in če ni velike izbire, kaj hitro sprejme tisto, kar se mu v zadnjem trenutku ponudi. In v veliko primerih to tudi več stane, kot je potrebno.

### Pomagamo vam!

Mi vam lahko tudi v tem delu priskočimo na pomoč ter vam po vaših željah in navodilih poiščemo vam cenovno zanimive nastanitvene možnosti glede na vaše potrebe.

- hotel (enoposteljne, dvoposteljne ali večposteljne sobe)
- apartmaji (s kuhinjo in ostalimi prednostmi kreativnosti)
- hostli (v kolikor ste pripravljeni deliti sobe z drugimi gosti in sklepati nova poznanstva)
- za poslovne dogodke (za poslovneže, skupine strokovnjakov/-in, skupine delavcev, itd.)

Zaupajte nam vaše načrte potovanja. Letovi in skupni bomo našli rešitev, ki bo njena na letošnem, vašim družinskim članom ali sorodnikom.

Looking for accommodation in a country you are yet to live in can be a very difficult and stressful process. In Slovenia your options include university accommodation, private flats and private rooms. Prices vary depending on the city and the type of accommodation chosen.

In Slovenia **student dormitories** are available for those coming as scholarship holders on a short-term exchange (3-9 months) within the [bilateral exchange programmes](#) or the [CEEPUS programme](#); for scholarship holders within the national programme for [Slovenes abroad](#) (without Slovenian citizenship), and for students within the context of the EU exchange programme [ERASMUS+](#). If you are coming as a private international student, unfortunately you do not have the option of staying in university student dormitories, except in Maribor.

## Entry and residence

The methods and conditions of entry of an individual into the Republic of Slovenia differ depending on whether the person entering the country is a citizen of a country that is a member of the European Economic Area (EEA), that is a Member State of the European Union, Norway, Iceland or Liechtenstein, or a national of a third country.

### Conditions of entry of EU citizens into Slovenia

Citizens of the European Union do not need a visa or residence permit to enter the Republic of Slovenia. They may enter Slovenia with a valid identity card or a valid passport, irrespective of the reason for entering or residing in the country – employment, study, self-employment, relocation, etc.

For the first three months after entry, they may reside in Slovenia without residence registration. However, for a longer stay, they are required to obtain a residence registration certificate at the administrative unit in the area of their residence before the expiry of the permitted three-month stay. They can also apply for a residence registration certificate immediately after entering the Republic of Slovenia.

## Active employment policy measures

Over the past few years, employment trends have begun to shift owing to economic growth. The employment of unemployed persons depends primarily on the economic situation and can be further stimulated by active employment measures and other labour market incentives. The former may generate additional motivation for unemployed persons and offer them additional training to upgrade their competences, which increases their employability and brings them closer to employers. It is a fact that only qualified individuals can have productive jobs that bring higher added value and boost the competitiveness of the Slovenian economy.

## Vulnerable groups in the labour market

The demand for labour force has increased due to economic growth, consequently reducing the number of unemployed persons while significantly increasing structural unemployment.

Currently, active employment measures and other labour market services are targeting the most vulnerable population groups in the labour market. Despite a favourable economic situation, these groups remain less competitive: on the one hand the long-term unemployed, often older persons lacking adequate qualifications, and on the other first-time job-seekers.

## Implementation of employment programmes

Most active employment programmes for the unemployed are implemented by the [Employment Service Z](#), which also keeps a record of registered unemployed persons and follows current employment trends in the labour market. The Employment Service helps unemployed persons plan their careers, offers counselling and motivation. When seeking job opportunities and drawing up the employment and career plan for each individual, several aspects are taken into consideration, in particular the individual's professional competences, employment interests, mobility, employment-seeking skills, and possible shortcomings or barriers preventing the individual from actively joining the labour market.

Active employment programmes for employed persons are implemented by the Public Scholarship, Development, Disability and Maintenance Fund

## Visit the herders' colourful everyday

Access to Velika planina is possible by cable car, which operates all year round.

### Velika Planina

High mountains, the views and relaxing environment in the traditional herder's settlement on Velika planina. Visit the easily accessible plateau, which offers magnificent views of the highest peaks of the Kamnik-Savinja Alps and the Ljubljana Basin.

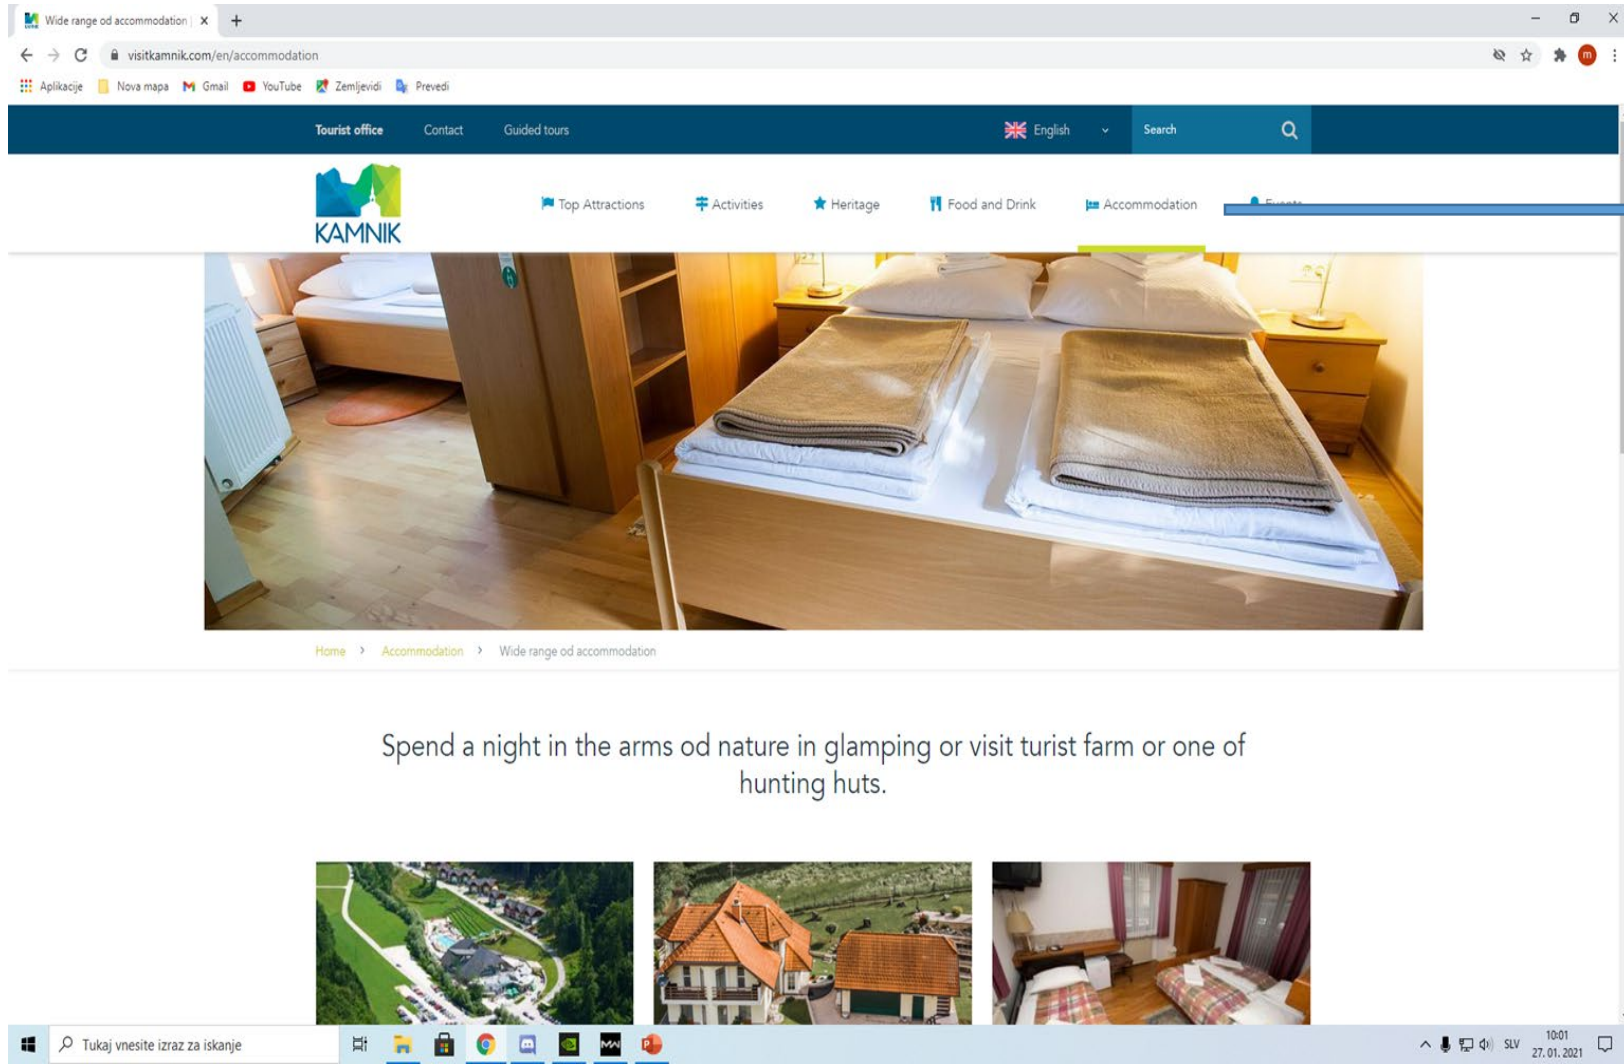

[More about Velika Planina](#)

There are about 200 huts on the alp, of which 63 form the herder's settlement, belonging to 63 grazing beneficiaries. Most of them come from the 13 villages under Velika Planina and Krvavec and own about 500 hectares of grassland and forests. They own about 380 heads of cattle. At the beginning of June, the herders bring their cattle to Velika planina, and stay here for three months. Due to the lack of herders, some farmers keep their cattle in the paddock, while the other is free to graze on the pasture. The herd of cows is led by the most experienced, which has a bell around the neck. Usually, cows are more accurate than their herder and calmly wait to be let into the stable.
