The PROJECT

YES Europe III is an Erasmus+ project successfully aimed at helping students to find study, training, and working options in Europe. Due to the pandemic, all mobilities were postponed several times and we decided to use eTwinning to meet each other and our countries first. Project duration: 2020 - 2023. Partner countries are: Germany, Bulgaria, Belgium, and North Macedonia

Expand your horizons and pave the way for the future!

In Europe today more and more young people know that they will be unemployed after finishing their schooling and therefore lack motivation to continue with their education and even drop out of school. There are young people needed in many work fields all over Europe however the students do not know how they can find a job outside their home country. They also do not know how to find study options that will enable them to work in a different European country.

During the project, students gained the necessary intercultural, methodical, linguistic, and ICT competencies to enable them to find work and study options in the European partner countries.

Expected RESULTS are:

- 1) To motivate students to meet different cultures and to improve their communication skills
- 2) To boost students' understanding of studies, jobs and careers abroad
- 3) To meet their partner's schools and VET profiles
- 4) To improve their communication skills and establish social contacts
- 5) To prepare for each mobility
- 6) To foster curiosity, creativity, love for learning
- 8) To work in international teams
- 9) To use various digital tools
- 10) To visit employee companies, job center and university in each country
- 11) To produce a USB Stick with logo created in a logo competition, Booklet and digital dictionary.
